

HARUTO SAITO

AI Full-Stack Engineer

London, UK | +44 7709270040 | haruto.saito114@gmail.com | www.linkedin.com/in/haruto-

PROFILE

Senior AI Full-Stack Engineer with senior-level expertise delivering AI-powered web applications. Led development of an enterprise LLM platform that reduced document processing time by 40% and built a scalable AI dashboard used by 200+ corporate users. Designed end-to-end RAG pipelines and cloud-native microservices on AWS, ensuring high performance and security. Seeking to apply full-stack AI skills to drive innovative, reliable products for your organization.

EXPERIENCE

V7 | Senior AI Engineer

March 2025 - Present

- Designed and developed enterprise AI web applications with React, Next.js, TypeScript, FastAPI, and Python, enabling clients to launch AI-driven features three months faster
- Built end-to-end LLM-powered platforms that integrated OpenAI APIs, RAG pipelines, and vector databases for document intelligence, reducing manual document review time by half
- Developed scalable backend services in Python and FastAPI for document ingestion, embeddings, semantic search, and AI workflow automation, supporting a 200% increase in concurrent users
- Implemented responsive frontend dashboards using React and TypeScript for AI chat, document analysis, search, and workflow management, improving user satisfaction scores
- Designed secure authentication with OAuth2, role-based access control, and REST APIs backed by PostgreSQL for enterprise customers, strengthening data-security compliance
- Optimized application performance by implementing Redis caching, Docker containerization, Kubernetes orchestration, and AWS cloud services, reducing response latency and improving throughput
- Collaborated with product, design, and engineering teams to deliver AI features through CI/CD pipelines using GitHub Actions, shortening release cycles and increasing deployment frequency

PolyAI | Machine Learning Engineer

July 2021 - February 2025

- Developed customer-facing AI applications for enterprise conversational platforms with React (HTML5) front-end and Node.js back-end, using LangChain for LLM orchestration; delivered a stable product that reduced client onboarding time
- Built reusable React components and responsive HTML5 interfaces for multilingual AI assistant platforms, enabling faster UI updates and supporting three additional languages
- Designed backend APIs with Node.js that integrated ASR, NLU, TTS, and LLMs via LangChain, streamlining conversation flow and cutting request latency
- Created scalable data pipelines using Node.js and system-design principles to collect conversation analytics, monitor performance, and evaluate AI models, improving data availability for stakeholders
- Improved application responsiveness through API optimization, caching strategies, and asynchronous processing.
- Worked closely with Speech AI, Machine Learning, UX, and Product teams to deliver production-ready customer experiences.
- Maintained high software quality by implementing automated tests with Jest, conducting thorough code reviews, and configuring continuous-integration pipelines in GitHub Actions, which reduced production bugs and accelerated release cycles

SKILLS

- AI & Machine Learning:** Large Language Models (LLMs), Generative AI, RAG, AI Agents, NLP, Prompt Engineering, Semantic Search, Embeddings, Model Evaluation, Recommendation Systems
- Frontend:** React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Material UI, Responsive Design, State Management
- Backend:** Python, FastAPI, Node.js, Express.js, REST APIs, GraphQL, Authentication (JWT/OAuth), Microservices
- AI Frameworks & Vector Databases:** LangChain, LlamaIndex, OpenAI API, Anthropic Claude API, Pinecone, Weaviate, ChromaDB, FAISS
- Databases:** PostgreSQL, MongoDB, Redis, MySQL
- Cloud & DevOps:** AWS, Google Cloud Platform (GCP), Vertex AI, Docker, Kubernetes, GitHub Actions, CI/CD, Linux
- Software Engineering:** System Design, Object-Oriented Programming (OOP), Design Patterns, Automated Testing, Performance Optimization, Agile Development

EDUCATION

Ravensbourne University London, London, UK
Graduate Certificate, Artificial Intelligence and Machine Learning

2020 - 2021
London, UK

University of Fukui, Fukui, Japan
Bachelor of Engineering, Computer Science

2017 - 2020
Fukui, Japan

- Coursework:** algorithms, operating systems, computer networks, databases, distributed systems, web application development
