

ELLIOTT WAVE

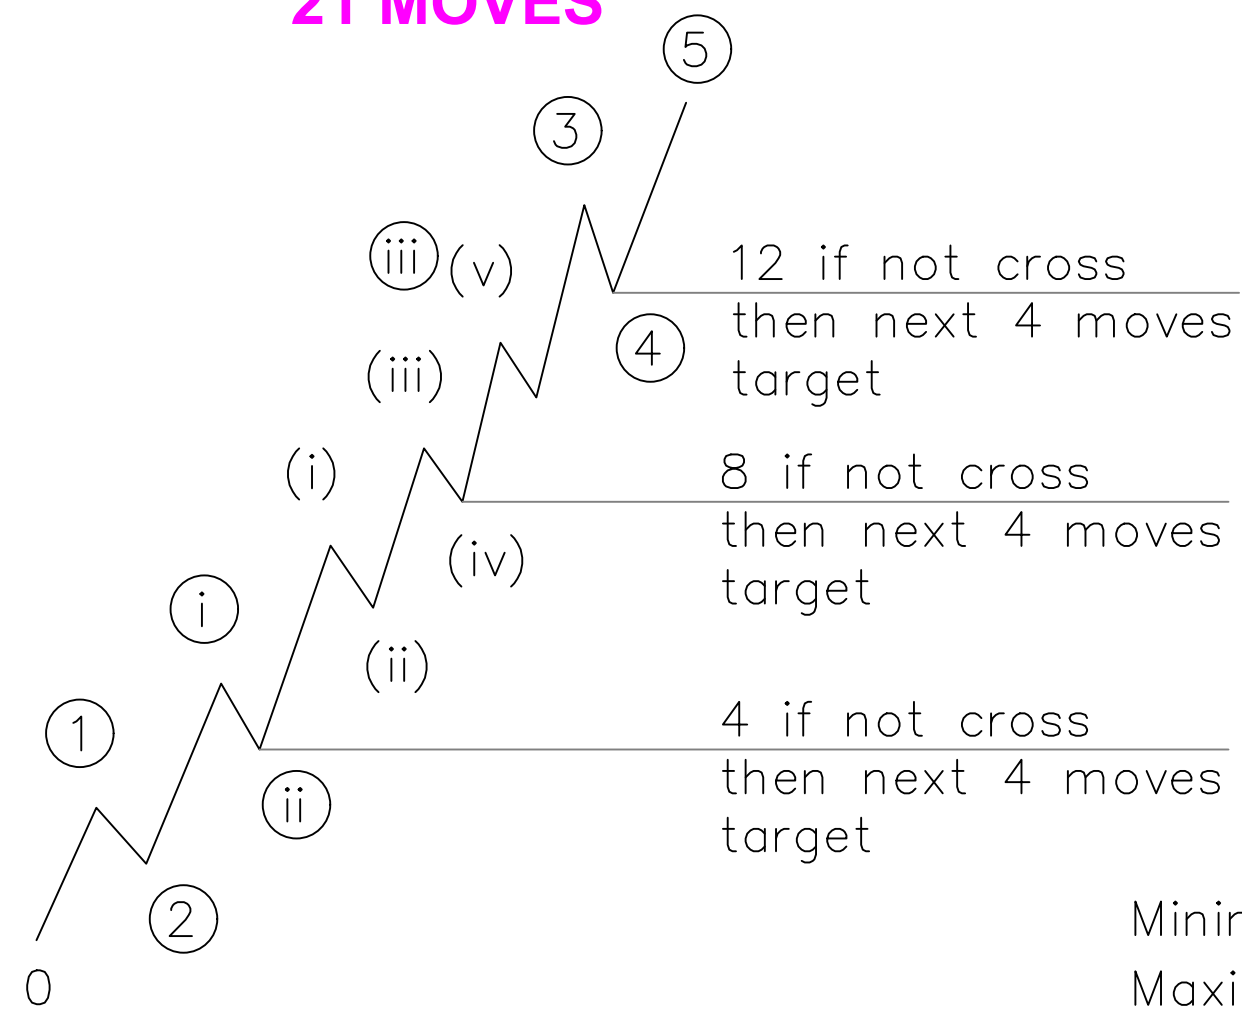

9 MOVES

EXTENSION
IN EXTENSION MAX 21 MOVES

13 MOVES

21 MOVES

Minimum Target 127% &
Maximum Target 261.8%

Retracement from Wave-3 to Wave-4

5 DEGREE

Rule of Alteration /
Overlapping:
Wave 2 & 4 is 5%(±)

Minimum Target 161.80% &
Maximum Target 2100%

Wave 3 use Tool Fib extension
from Base point (0) zero to Wave-1
& second point Wave-2

3 DEGREE

SUB-ORDINATES

23% Retracement minimum &
38.20% Retracement maximum
from Base point to 3 Dgree

4 DEGREE

IMPORTANT HIGH

61.80% Retracement Touch or cross
From Important High to
Important low
FORMATION OF 1 DEGREE OR WAVE

Rule of Alteration /
Overlapping:
Wave 2 & 4 is 5%(±)

1 DEGREE

38.20% Retracement minimum &
81.20% Retracement maximum
from Impotrant low to 1 Dgree
FORMATION OF 2 DEGREE OR WAVE

2 DEGREE

LTD
POSSIBILITY
IN WAVE 1st

IMPORTANT LOW

Rule of Alteration / Overlapping:

Wave 2 & Wave 4 Will be same fall in % or (±)5%
for Exp. Wave 2 fall 13% so Wave 4 will be fall same as 13% or 18% or 23%

Major rule :

Wave 3rd if it is less than 161.80%, Trend fib 1 & 2 then only we think it is in Leading Diagonal and then also we have to check Wave 2 & 4 alternation rule is satisfy or not. if both are satisfy check Time of call also 1/4 or 1/2 Reversal is happening then we can say that LDT is proper consider is first wave.

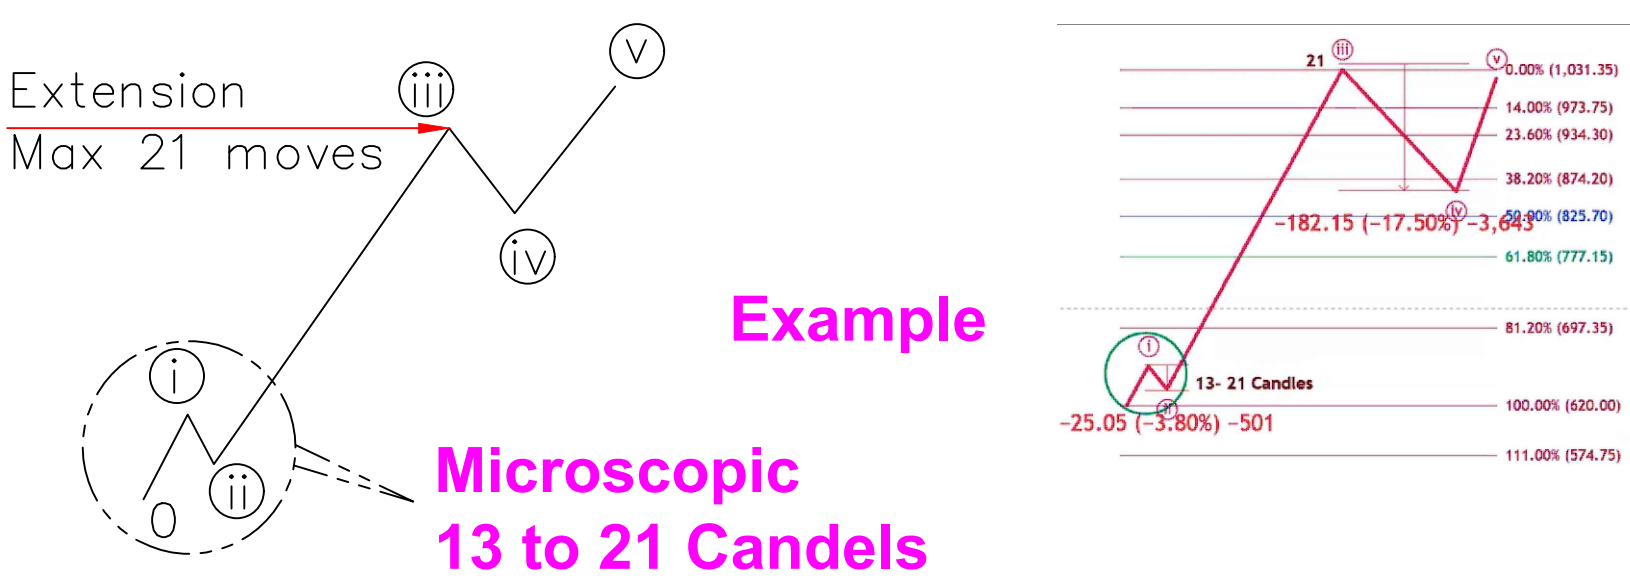

Time count :

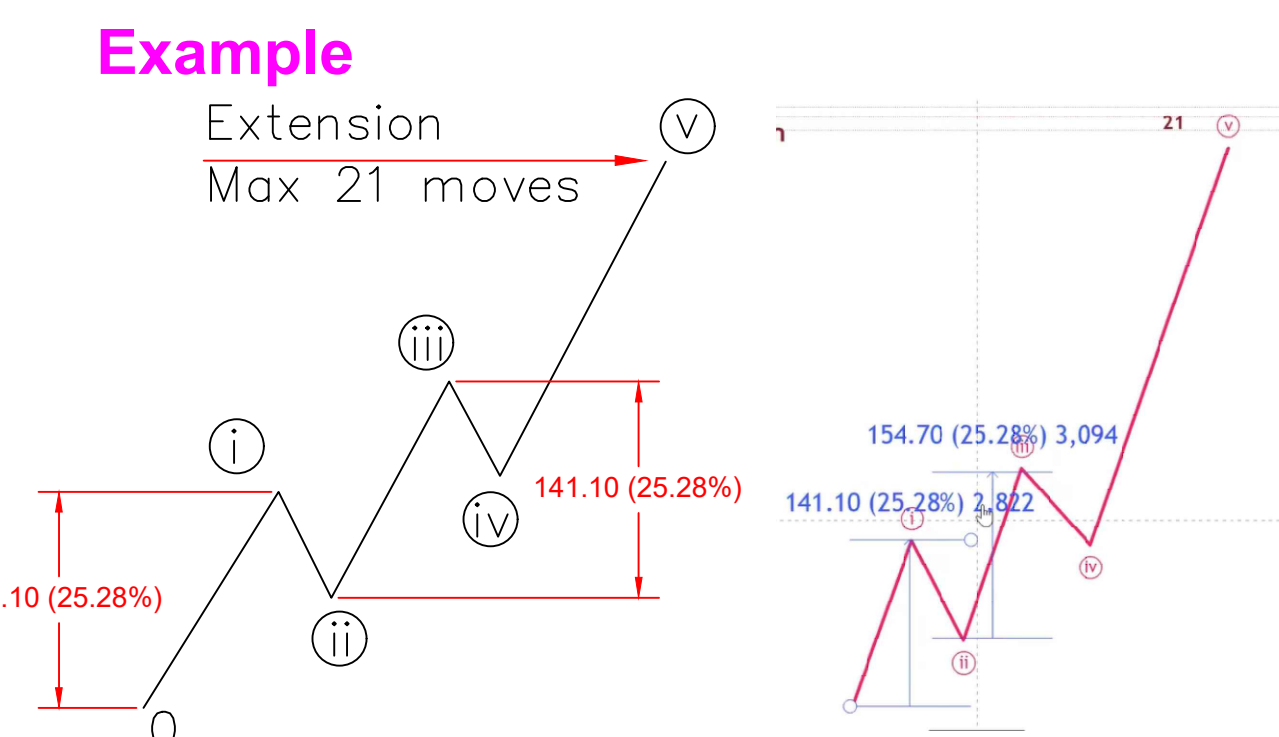

Total bars from 0 to Wave 5th = 168
so, 168 ka 1/4 Minimum criteria (168/4) = 42 bars
(In counting ignore the point value)
so, 168 ka 1/2 Maximum criteria (168/2) = 84 bars
so, wave 2nd 1/4 Minimum criteria (49/4) = 12 bars (days)
so, wave 2nd 1/2 Maximum criteria (49/2) = 24 bars (days)

3 Rule of extension:

1) When wave 1st & 2nd both are in Microscopic Nature
then wave 3rd will be in Extension.

2) When wave 1st & 3rd both are in same length
then wave 5th in Extension.

3) When wave 3st & 5th both are in same length
then wave 1st in Extension.

Diagonal Formation: If wave 1st is considered an extension,
then a diagonal formation will occur now
